Increasing regulatory focus

- Treating customers fairly has evolved into the more broader term conduct risk
- Broader questions are now being raised about where conduct risks arise and how they are managed
- New areas of discussion include culture, behaviour and ethics

"...with great trust comes great responsibility....banks should treat their customers fairly when providing various services and financial products to them, and should stand in customers' shoes in pursuing profit."

(Norman Chan, HKMA, October 2015)

We continue to believe that a cultural shift within firms to celebrating good conduct that places consumer interests and market integrity at the heart of the financial sector will benefit all stakeholders. We continue to address conduct issues arising from failures in firm culture and are committed to ensuring this momentum is not lost (John Griffith Jones, FCA, April 2016)

Supervision of behavior and culture has proved to be a valuable supplement to the more traditional forms of supervision, as it addresses the causes of behavior that impacts the performance and risk profile of financial institutions and consequently on financial stability (The Dutch Central Bank, September 2015)

The main focus is on customer conduct risk

Embedding a culture which places consumer interests at the heart of the business will ensure the protection of consumers, market integrity and effective competition.

EY's conduct risk framework

Moving towards a strategic based approach

Important notes:

- Set a risk appetite for conduct risk
- Align conduct risk with mission statement

Delivering and embedding a Conduct Risk framework is the responsibility of the business...

Conduct should never be 'outsourced' to the risk functions....

Internal Audit

Provides independent testing and verification the operating effectiveness of the Conduct Risk Framework (recent focus on outcome testing)

- More and more forward looking: greater emphasis on reporting and data analytics.

Role of the IAD

- Managing and mitigating conduct risk integral part of IA plans
- Asses whether controls in place are adequate and effective to mitigate risk
- Assess whether the organization has the right forward-looking view
