Audit committee challenges and priorities

Given expectations for slow growth and economic and political uncertainty, technology advances and business model disruption, cyber threats, greater regulatory scrutiny, and investor demands for transparency, it's hardly surprising that most audit committees around the world point to risk management as the top challenge facing the company in the year ahead. More than 40 percent of respondents say their risk management systems require substantial work.

Audit committees, by and large, continue to express confidence in financial reporting and audit quality; yet, along with risk management, our 2017 Global Audit Committee Pulse Survey highlights ongoing concerns about legal and regulatory compliance, managing cyber security risk, and managing the control environment in the company's extended organization.

Of the more than 800 audit committee members responding to our survey, nearly 4 in 10 said the committee's effectiveness would be most improved by having a "better understanding of the business and key risks," while nearly a third said additional expertise related to technology or cyber security would be helpful.

Overall, audit committees are largely satisfied that their agendas are properly focused on legal and regulatory compliance issues, maintaining internal controls over financial reporting, and key assumptions underlying critical accounting

estimates. However, they see room for improvement when it comes to focusing on CFO succession planning, talent and skills in the finance organization, tone at the top and culture, and aligning the company's short- and long-term priorities.

Most audit committees say their organizations have a long way to go in their efforts to implement major new accounting standards. Fewer than 15 percent report a clear implementation plan for the new revenue recognition standard, and fewer than 10 percent reported a clear plan for implementation of the new leasing standard. And of those whose companies are affected by the Organisation for Economic Co-operation and Development's (OECD) country-by-country tax reporting, many expressed concern about the lack of clarity or communication with their committee on that issue. Survey respondents also cited ongoing opportunities to improve their company's ability to manage cyber risks.

Of course, these challenges will vary by company and by country (and it is difficult to compare data from 15 countries, often with markedly different business environments, regulatory requirements, and corporate governance practices). But our survey findings offer insights that audit committees around the world can use to sharpen the committee's focus, benchmark its responsibilities and practices, and strengthen its oversight.

– KPMG's Audit Committee Institute

Six takeaways

Risk management is a top concern for audit committees. The effectiveness of risk management programs generally, as well as legal/regulatory compliance, cyber security risk, and the company's controls around risks, topped the list of issues that survey participants view as posing the greatest challenges to their companies. It's hardly surprising that risk is top of mind for audit committees—and very likely, the full board—given the volatility, uncertainty, and rapid pace of change in the business and risk environment. More than 40 percent of audit committee members think their risk management program and processes “require substantial work,” and a similar percentage say that it is increasingly difficult to oversee those major risks.

Internal audit can maximize its value to the organization by focusing on key areas of risk and the adequacy of the company's risk management processes generally. The survey results show that audit committees are looking to internal audit to focus on the critical risks to the business, including key operational risks (e.g., cyber security and technology risks) and related controls—and not just compliance and financial reporting risks. They also want the audit plan to be flexible and adjust to changing business and risk conditions.

Tone at the top, culture, and short-termism are major challenges—and may need more attention. A significant number of audit committee members—roughly one in four—ranked tone at the top and culture as a top challenge, and nearly one in five cited short-term pressures and aligning the company's short- and long-term priorities as a top challenge. Meanwhile, nearly the same percentage of audit committee members said they are not satisfied that their committee agenda is properly focused on those issues.

CFO succession planning and bench strength in the finance organization continue to be weak spots. Forty-four percent of audit committees are not satisfied that their agenda is properly focused on CFO succession planning, and another 46 percent are only somewhat satisfied. In addition, few are satisfied with the level of focus on talent and skills in the finance organization. Given the increasing demands on the finance organization and its leadership—financial reporting and controls, risk management, analyzing mergers and acquisitions (M&A) and other growth initiatives, shareholder engagement, and more—audit committees want to devote more time to the finance organization, including the talent pipeline, training, and resources, as well as succession planning for the CFO and other key finance executives.

Two key financial reporting issues may need a more prominent place on audit committee agendas: Implementation of new accounting standards and non-GAAP financial measures. Few audit committees say their companies have clear implementation plans for two major accounting changes on the horizon—the new revenue recognition and lease accounting standards. Given the scope and complexity of those implementation efforts and their impact on the business, systems, controls, and resource requirements, those efforts should be a key area of focus. In addition, audit committees ought to consider whether to increase attention to any non-GAAP financial measures, which are an area of significant attention and comment by regulators worldwide. Nearly a quarter of those surveyed say their role with respect to the presentation of those metrics is very limited.

Audit committee effectiveness hinges on understanding the business. Audit committee members say a better understanding of the business and the company's key risks would most improve their oversight effectiveness. They also view additional expertise in technology/cyber security as being key to greater effectiveness, since it would strengthen their ability to oversee those risks.

Risk management is a top concern for audit committees.

The effectiveness of risk management programs generally, as well as legal/regulatory compliance, cyber security risk, and the company's controls around risks, topped the list of issues that survey participants view as posing the greatest challenges to their companies. It's hardly surprising that risk is top of mind for audit committees—and very likely, the full board—given expectations for slow growth and

economic uncertainty, technology advances and business model disruption, cyber threats, and greater regulatory scrutiny and investor demands for transparency. But more than 40 percent of audit committee members think their risk management program and processes "require substantial work," and a similar percentage say that it is increasingly difficult to oversee those major risks.

From your perspective as an audit committee member, which of the following issues pose the greatest challenges to your company? (select up to three)

Multiple responses allowed

We are clearly seeing an increased focus by boards on key operational risks across the extended global organization—e.g., supply chain and outsourcing risks, information technology (IT) and data security risks, etc. And, at a higher level, boards are paying more attention to the capital "R" risks that may pose the greatest risk to the company. In today's business environment, it is more important than

ever that the board be sensitive to the tone from, and example set by, leadership; reinforce organizational culture (i.e., what the company does, how it does it, including a commitment to compliance and the management of risk); and understand the behaviors that the company's incentive structure may encourage.

Q

What is the status of your company's risk management program/process?

Risk management system implemented but requires substantial work

Robust, mature risk management system in place

Risk management system in planning/development stage

4%

No active/formal effort to implement risk management system

1%

Other

Q

Are you satisfied that your audit committee has the time and expertise to oversee the major risks on its agenda in addition to carrying out its core oversight responsibilities?

Time

Expertise

Yes

Yes – but increasingly difficult

No

May not equal 100% due to rounding

In your view, what are the most significant gaps in your company's ability to manage cyber risk? (select up to two)

Multiple responses allowed

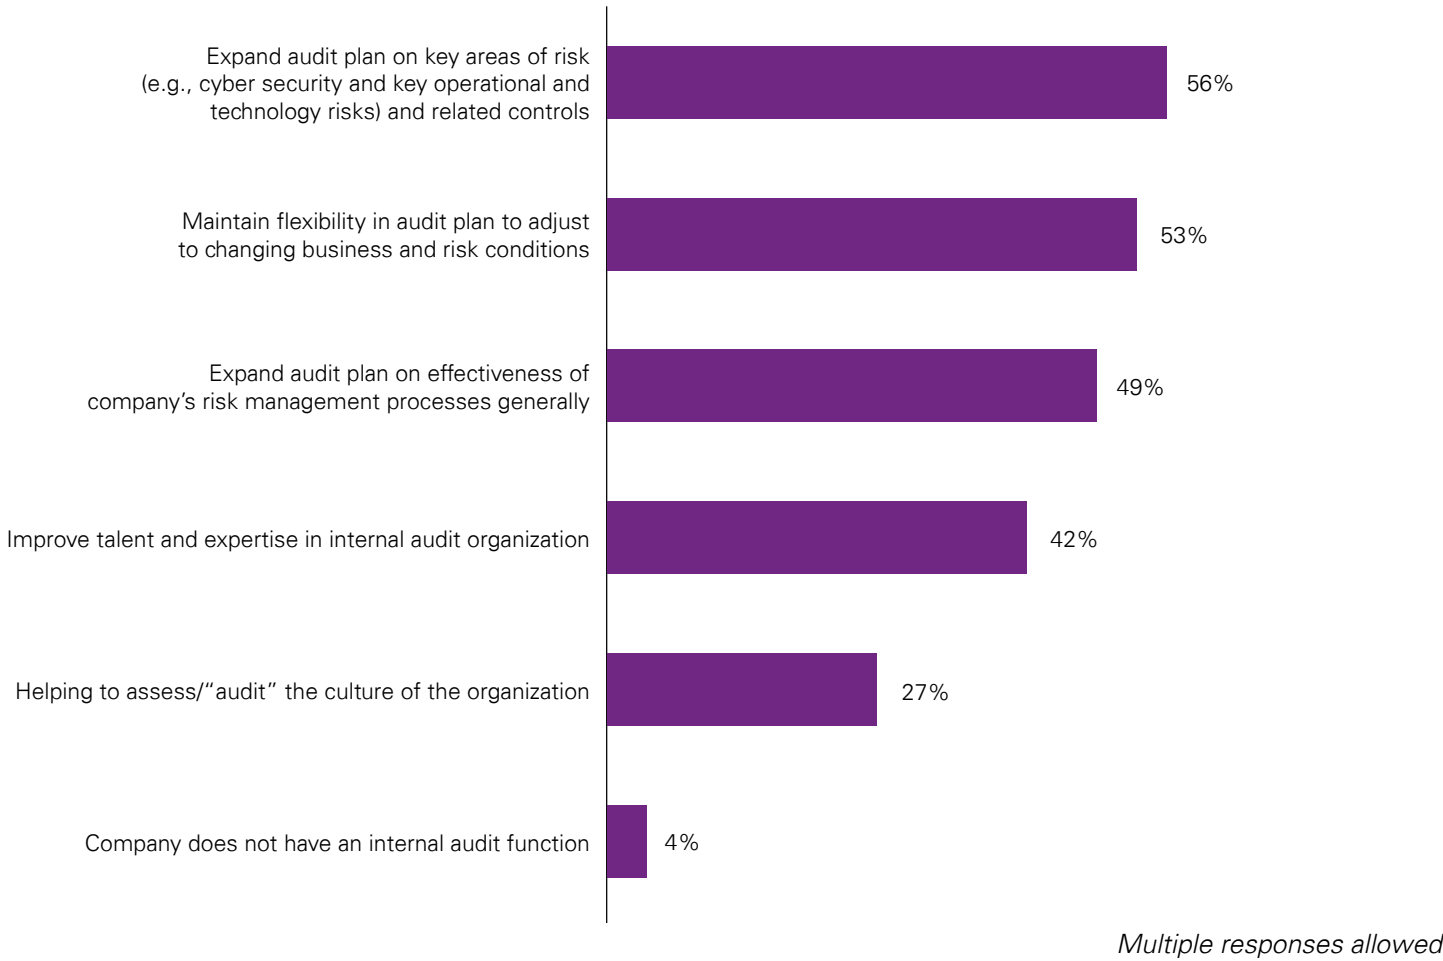

Despite the intensifying focus on cyber security, the cyber risk landscape remains fluid and opaque, even as expectations rise for more engaged oversight. As the cyber landscape evolves, board oversight—and the nature of the conversation—must continue to evolve. Discussions are shifting from prevention to an emphasis on detection and

containment and are increasingly focused on the company's "adjacencies," which can serve as entry points for hackers. The board should help elevate the company's cyber risk mind-set to an enterprise level, encompassing key business leaders, and help ensure that cyber risk is managed as a business or enterprise risk—not simply an IT risk.

Internal audit can maximize its value to the organization by focusing on key areas of risk and the adequacy of the company’s risk management processes generally.

The survey results show that audit committees are looking to internal audit to focus on the critical risks to the business, including key operational risks (e.g., cyber security and technology risks) and related controls—and not just compliance and financial reporting risks. They also want the audit plan to be flexible and adjust to changing business and risk conditions.

Q Beyond focusing on financial reporting and compliance risks, what steps can internal audit take to maximize its value to your organization? (select all that apply)

Internal audit is most effective when it is focused on the critical risks to the business, including key operational risks (e.g., cyber security and technology risks) and related controls—not just compliance and financial reporting risks. Help define the scope of internal audit’s coverage—and if necessary, redefine internal audit’s role. Challenge internal audit to take the lead in coordinating with other

governance, risk, and compliance functions within the organization to limit duplication and, more importantly, to prevent gaps. Help maximize collaboration between internal and external auditors.

As internal audit moves to a higher value-added model, it should become an increasingly valuable resource for the audit committee.

Tone at the top, culture, and short-termism are major challenges—and may need more attention.

As shown by the chart on page 6, a significant number of audit committee members—roughly one in four—ranked tone at the top and culture as a top challenge, and nearly one in five cited short-term pressures and aligning

the company’s short- and long-term priorities as a top challenge. Meanwhile, nearly the same percentage of audit committee members said they are not satisfied that their committee agenda is properly focused on those issues.

Q How satisfied are you that your audit committee agenda is properly focused on the issue(s) that you identified in question 1 as the greatest challenges to your company?

Monitoring the alignment of short-term activities and long-term strategy is always challenging, but certain indicators can provide early warning of over-emphasis on the short-term, such as: presentations to the board tend to focus heavily on historical issues or topics that have a short-term focus; forward-looking boardroom discussions about emerging risks and opportunities are infrequent; incentive

compensation plans are tied strongly to short-term goals and metrics, with few or no long-term objectives; and nonfinancial performance measures that contribute to long-term growth (e.g., product quality and customer satisfaction) are given little or no weight in performance assessments.¹

¹ NACD, NACD Blue Ribbon Commission Report on the Board and Long-Term Value Creation, 2015.

CFO succession planning and bench strength in the finance organization continue to be weak spots.

Forty-four percent of audit committees are not satisfied that their agenda is properly focused on CFO succession planning, and another 46 percent are only somewhat

satisfied. In addition, few are satisfied with the level of focus on talent and skills in the finance organization.

Given the increasing demands on the finance organization and its leadership—financial reporting and controls, risk management, analyzing M&A and other growth initiatives, shareholder engagement, and more—audit committees want to devote more time to the finance organization, including the talent pipeline, training, and resources, as well as succession planning for the CFO and other key

finance executives. How does the audit committee assess the finance organization's bench strength? Do employees have the training and resources they need to succeed? How are they incented to stay focused on the company's long-term performance? What are the internal and external auditors' views?

Two key financial reporting issues may need a more prominent place on audit committee agendas: Implementation of new accounting standards and non-GAAP financial measures.

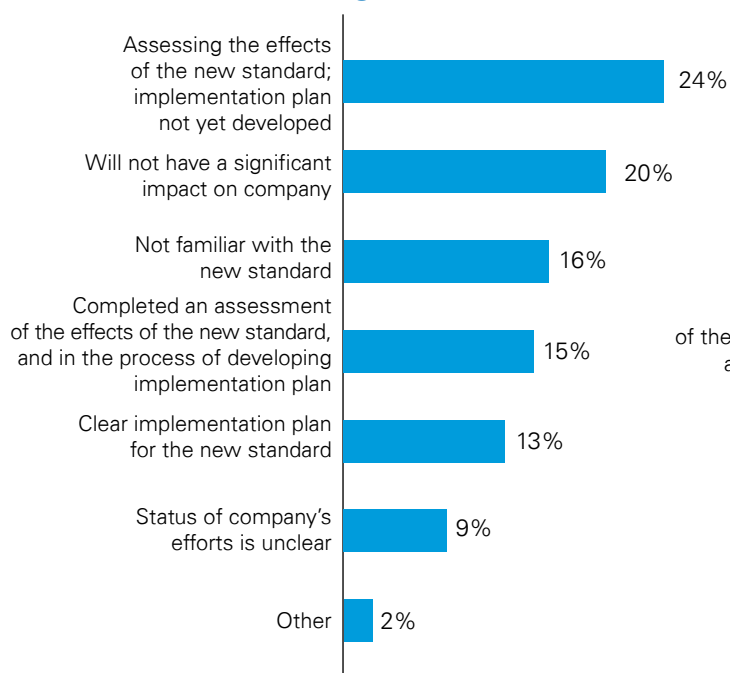

Few audit committees say their companies have clear implementation plans for two major accounting changes on the horizon—the new revenue recognition and lease accounting standards. Given the scope and complexity of those implementation efforts and their impact on the business, systems, controls, and resource requirements, those efforts should be a key area of focus.

In addition, audit committees ought to consider whether to increase attention to any non-GAAP financial measures, which are an area of significant attention and comment by regulators worldwide. Nearly a quarter of those surveyed say their role with respect to the presentation of those metrics is very limited.

What is the status of your company's efforts to implement the new IASB/FASB revenue recognition and leasing standards?

New revenue recognition standard

New leasing standard

May not equal 100% due to rounding

What is your audit committee's role in considering how the company should present non-GAAP financial measures—and which ones to present? (select all that apply)

Audit committee discusses with management the process by which management develops non-GAAP financial measures

Discusses adequacy of disclosure controls and processes around development of non-GAAP financial measures

Company does not provide non-GAAP financial measures

24%

Discusses the correlation of the non-GAAP financial measures with actual state of the business and results

24%

Audit committee's role/input is very limited

Multiple responses allowed

It is critical that non-GAAP measures have a prominent place on the audit committee agenda and that the committee have a robust dialogue with management about the process—and controls—by which management develops and selects the non-GAAP financial measures it provides and their correlation to the performance of the business and results. Among the questions to consider:

What is the process by which the company decides whether to present non-GAAP measures—and which ones to provide? What is the role of management's disclosure committee? What is the role of the audit committee? Is the audit committee satisfied that non-GAAP measures are being used to improve transparency and not to distort results?

Audit committee effectiveness hinges on understanding the business.

Audit committee members say a better understanding of the business and the company's key risks would most improve their oversight effectiveness. They also view

additional expertise in technology/cyber security as being key to greater effectiveness, since it would strengthen their ability to oversee those risks.

Q

What would most improve your committee's overall effectiveness? (select up to three)

Multiple responses allowed

Which—if any—of the following areas pose significant concern to you in terms of the company’s readiness for the OECD’s country-by-country tax reporting (first report due December 31, 2017, for calendar year companies)? (select all that apply)

Multiple responses allowed

The obligation to report country-by-country tax information to all jurisdictions is also on the immediate horizon, and the impact on multinationals will be profound, with significant implications for tax compliance and reporting functions, transfer pricing policies, tax audits and controversies, and reputational risk. Audit committees of multinationals will want to assess their company's readiness: What systems

and process changes will be required to comply with the new documentation requirements? Have we assessed our transfer pricing strategies and identified those that are likely to be challenged? Do we have an effective communications plan to explain and interpret the country-by-country data and appropriately defend our transfer pricing strategies?

Benchmark your own views

Q1 From your perspective as an audit committee member, which of the following issues pose the greatest challenges to your company? (select up to three)

- ☐ Effectiveness of risk management program
- ☐ Legal/regulatory compliance
- ☐ Managing cyber security risk
- ☐ Maintaining the control environment in the company's extended organization
- ☐ Tone at the top and culture of the organization
- ☐ Maintaining internal controls over financial reporting
- ☐ Ensuring that internal audit is maximizing its value
- ☐ Pressures of short-termism and aligning the company's long-term and short-term priorities
- ☐ Implementation of new accounting standards (e.g., revenue recognition, leases, financial instruments, etc.)
- ☐ Fraud risk
- ☐ Talent and skills in the finance organization
- ☐ Key assumptions underlying critical accounting estimates
- ☐ Assessing audit quality
- ☐ CFO succession planning
- ☐ Readiness for the OECD's country-by-country tax reporting
- ☐ Other

Q2 What is the status of your company's risk management program/process?

- ☐ Risk management system implemented but requires substantial work
- ☐ Robust, mature risk management system in place
- ☐ Risk management system in planning/development stage
- ☐ No active/formal effort to implement risk management system
- ☐ Other

Q3 Are you satisfied that your audit committee has the time and expertise to oversee the major risks on its agenda in addition to carrying out its core oversight responsibilities?

Time

- ☐ Yes
- ☐ Yes – but increasingly difficult
- ☐ No

Expertise

- ☐ Yes
- ☐ Yes – but increasingly difficult
- ☐ No

Q4 In your view, what are the most significant gaps in your company's ability to manage cyber risk? (select up to two)

- ☐ Keeping technology systems up to date
- ☐ Organizational awareness/culture
- ☐ Vulnerability from third parties/supply chain
- ☐ Talent/expertise
- ☐ Monitoring and reporting of cyber threats (e.g., dashboard)
- ☐ Internal "people" risk
- ☐ Readiness and response/containment of breaches
- ☐ No significant gaps
- ☐ Other

Q5 Beyond focusing on financial reporting and compliance risks, what steps can internal audit take to maximize its value to your organization? (select all that apply)

- ☐ Expand audit plan on key areas of risk (e.g., cyber security and key operational and technology risks) and related controls
- ☐ Maintain flexibility in audit plan to adjust to changing business and risk conditions
- ☐ Expand audit plan on effectiveness of company's risk management processes generally
- ☐ Improve talent and expertise in internal audit organization
- ☐ Helping to assess/"audit" the culture of the organization
- ☐ Company does not have an internal audit function
- ☐ None of the above

Q6 How satisfied are you that your audit committee agenda is properly focused on the issue(s) that you identified in question 1 as the greatest challenges to your company?

- ☐ Effectiveness of risk management program
- ☐ Legal/regulatory compliance
- ☐ Managing cyber security risk
- ☐ Maintaining the control environment in the company's extended organization
- ☐ Tone at the top and culture of the organization
- ☐ Maintaining internal controls over financial reporting
- ☐ Ensuring that internal audit is maximizing its value
- ☐ Pressures of short-termism and aligning the company's long-term and short-term priorities
- ☐ Implementation of new accounting standards (e.g., revenue recognition, leases, financial instruments, etc.)
- ☐ Fraud risk
- ☐ Talent and skills in the finance organization
- ☐ Key assumptions underlying critical accounting estimates

Q6 (continued)

- ☐ Assessing audit quality
- ☐ CFO succession planning
- ☐ Readiness for the OECD's country-by-country tax reporting
- ☐ Other

Q7 What is the status of your company's efforts to implement the new IASB/FASB revenue recognition and leasing standards?

New revenue recognition standard

- ☐ Assessing the effects of the new standard; implementation plan not yet developed
- ☐ Will not have a significant impact on company
- ☐ Not familiar with the new standard
- ☐ Completed an assessment of the effects of the new standard, and in the process of developing implementation plan
- ☐ Clear implementation plan for the new standard
- ☐ Status of company's efforts is unclear
- ☐ Other

New leasing standard

- ☐ Will not have a significant impact on company
- ☐ Assessing the effects of the new standard; implementation plan not yet developed
- ☐ Not familiar with the new standard
- ☐ Completed an assessment of the effects of the new standard, and in the process of developing implementation plan
- ☐ Status of company's efforts is unclear
- ☐ Clear implementation plan for the new standard
- ☐ Other

Q8 What is your audit committee's role in considering how the company should present non-GAAP financial measures—and which ones to present? (select all that apply)

- ☐ Audit committee discusses with management the process by which management develops non-GAAP financial measures
- ☐ Discusses adequacy of disclosure controls and processes around development of non-GAAP financial measures
- ☐ Company does not provide non-GAAP financial measures
- ☐ Discusses the correlation of the non-GAAP financial measures with actual state of the business and results
- ☐ Audit committee's role/input is very limited

Q9 What would most improve your committee's overall effectiveness? (select up to three)

- ☐ Better understanding of the business and risks
- ☐ Additional expertise—technology/cyber security
- ☐ Greater willingness and ability to challenge management
- ☐ Greater diversity of thinking, background, perspectives, and experiences
- ☐ More in-depth financial reporting and audit expertise
- ☐ Bringing "fresh thinkers" onto the committee
- ☐ Deeper engagement by committee members
- ☐ Additional expertise—M&A, industry knowledge, risk, international, or other area
- ☐ Better pre-meeting materials
- ☐ Improved management of meeting agendas
- ☐ Clear succession plan for audit committee chairmen/members
- ☐ Removal of underperforming director(s)
- ☐ Better chemistry/dynamics
- ☐ Other

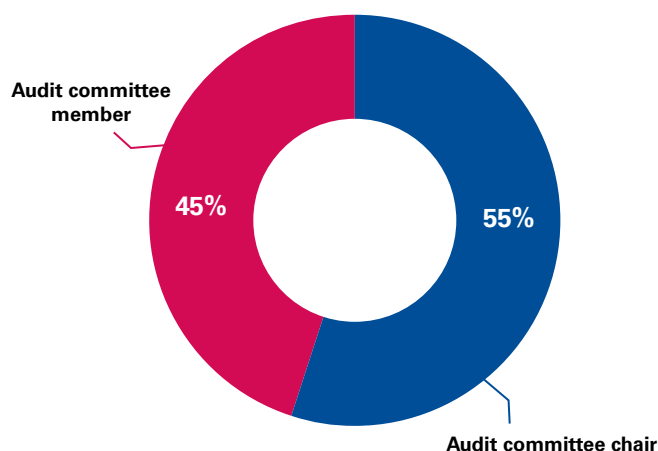

Q10 Which—if any—of the following areas pose significant concern to you in terms of the company's readiness for the OECD's country-by-country tax reporting (first report due December 31, 2017, for calendar year companies)? (select all that apply)

- ☐ Company is not affected
- ☐ Lack of clarity or communication with the audit committee on this issue to date
- ☐ Identification of systems and process changes that will be required to comply with the new documentation requirements
- ☐ Reassessment of transfer pricing strategies and identification of those that are likely to be challenged
- ☐ Development of a communications plan to explain and interpret the country-by-country data and defend our transfer pricing strategies
- ☐ No concern about the company's readiness
- ☐ Other
